Features & Benefits

- **Automatically adjusts home's relative humidity (RH)** based on the outdoor temperature and home-owner's preferred level of comfort
- **Continually protects home and furnishings** against the damaging effects of dry or overly-humidified indoor air
- **Offers strong defense against "sick house" conditions** that cause or aggravate allergies, colds, flu and respiratory ailments
- **Solid-state components** provide safer, more reliable operation
- **Duct-mount design** eliminates unsightly wall-mounting and the chore of fishing wires through walls
- **Set-it-and-forget-it technology** maintains a constant, comfortable level of humidity throughout the heating season
- **Safety-conscious design** does not intrude into the return air duct; exposed materials and components are UV resistant
- **Optional manual installation** allows residents to fine-tune indoor RH at the turn of a dial
